Oil resistance according to requirements of DIN EN 681-2:2006-11

To whom it may concern,

with this letter we can confirm that the EPDM rubber part of our lip-seals type MD-Safe (EPDM/PP) was tested according to the requirements of the standard DIN EN 681-2:2006-11, clause 5.10 "volume change in oil". The testing was performed on samples from the product itself and on sample sheets made from the rubber raw material. All tests were passed.

Sincerely,

Siegfried Meyer
General Manager
